Getting Started

Installing the nano-SIM Card (Included)

Power off the phone before installing or removing the nano-SIM card.

 **NOTE:**

Your phone will come with the nano-SIM card already installed.

 **WARNING!**

To avoid damage to the phone, do not use any other kind of SIM cards, or any non-standard nano-SIM card cut from a SIM card. You can get a standard nano-SIM card from your service provider.

1. Insert your fingernail into the bottom right corner of the back cover and lift it up gently. If the battery is inside, remove it as well.

2. Hold the nano-SIM card with the cut corner oriented as shown and slide it into the card slot.

3. Replace the battery and the back cover.

Installing a microSDHC Card (Not Included)

The microSDHC card can be installed and removed while the phone is turned on. When the phone is on, unmount the microSDHC card before removing it (see [Using the microSDHC Card as Portable or Device Storage](#)).

1. Insert your fingernail into the bottom right corner of the back cover and lift it up gently.
2. Hold the microSDHC card with the metal contacts facing down and the cut corner oriented as shown, and slide it into the card slot.

3. Replace the back cover.

 **NOTE:**

Some applications may require a microSDHC card to work normally and/or may store data on the card. Therefore, it is recommended that you keep a microSDHC card installed and not remove or replace it randomly.

Installing the Battery (Included)

1. Insert your fingernail into the bottom right corner of the back cover and lift it up gently.
2. Insert the battery by aligning the metal contacts on the battery with the metal contacts in the battery compartment. Gently push down on the battery until it clicks into place.

3. Replace the back cover.

Charging the Battery

Your phone's battery should have enough power for the phone to turn on, find a signal, and make a few calls. You should fully charge the battery as soon as possible.

If the battery is low, a pop-up message will appear on the screen. As you charge your phone, the screen will show the exact battery level.

WARNINGS!

Use only ZTE-approved chargers and USB cables. The use of unapproved accessories could damage your phone or cause the battery to explode.

1. Connect the adapter to the charging jack. Ensure that the adapter is oriented correctly. Do not use force.

2. Connect the charger to a standard AC power outlet. If the phone is on, you'll see a charging icon, such as  or , appear in the status bar.
3. Disconnect the charger when the battery is fully charged.

 **NOTE:**

If the battery is extremely low, you may be unable to power on the phone even when it is being charged. In this case, try again after charging the phone for at least 20 minutes. Contact customer service if you still cannot power on the phone after prolonged charging.

Extending the Battery Life

Active applications, screen brightness levels, *Bluetooth* and Wi-Fi usage, and GPS functionality can drain your battery. You can follow the helpful tips below to conserve your battery power:

- Reduce the screen backlight time.
- Lower the screen brightness.
- Turn auto-sync, Wi-Fi, and *Bluetooth* off when not in use.
- Disable the GPS function when not in use. Most applications using this function will periodically query the GPS satellites for your current location; each query drains your battery.
- Use the Battery saver feature.

Powering Your Phone On/Off

- Press and hold the **Power** key to turn on your phone.
- To turn it off, press and hold the **Power** key to open the options menu. Touch **Power off**.

NOTE:

If the phone freezes or takes too long to respond, press and hold the **Power** key for about 10 seconds to restart the phone.

Setting Up Your Phone for the First Time

When you first power on your phone after you purchase it or reset it to factory settings (see [Backup & Reset](#)), you will need to set it up before using it. First configure Talkback or other accessibility features and touch **Next**, then follow the prompts to set up your language, Wi-Fi, name, protection, Google services, and other options.

Locking/Unlocking the Screen and Keys

Your phone allows you to quickly lock the screen and keys (put the phone into sleep mode) when not in use and also to turn the screen back on and unlock it when you need it.

Locking the Screen and Keys

To quickly turn the screen off and lock the keys, press the **Power** key.

 **NOTE:**

To save battery power, the phone automatically turns off the screen after a certain period of time when you leave it idle. You will still be able to receive messages and calls while the phone screen is off.

Unlocking the Screen and Keys

1. Press the **Power** key to turn the screen on.
2. Touch and hold a blank area of the screen to unlock the phone, touch and hold  at the bottom right to open the Camera app, or touch and hold  at the bottom left to use Google voice commands. You can also double-tap a notification to open the related app.

NOTE:

If you have set an unlock pattern, a PIN, or a password for your phone (see [Protecting Your Phone With Screen Locks](#)), you'll need to draw the pattern or enter the PIN/password to unlock your screen.

Using the Touch Screen

Your phone's touch screen lets you control actions through a variety of touch gestures.

- **Touch** – When you want to type using the on-screen keyboard, select on-screen items (such as application and settings icons), or press on-screen buttons, simply touch them with your finger.
- **Touch and Hold** – To open the available options for an item (for example, an app icon or a link in a web page), touch and hold the item.
- **Swipe or Slide** – To swipe or slide means to quickly drag your finger vertically or horizontally across the screen.

- **Drag** – To drag, press and hold your finger with some pressure before you start to move your finger. While dragging, do not release your finger until you have reached the target position.
- **Pinch** – In some apps (such as Maps, web browser, and Gallery), you can zoom in and out by placing two fingers on the screen at once and pinching them together (to zoom out) or spreading them apart (to zoom in).
- **Rotate the Screen** – For most screens, you can automatically change the screen orientation from portrait to landscape by turning the phone sideways.

NOTES:

- The Auto-rotate feature needs to be enabled for the screen orientation to automatically change. From the home screen, touch  > **Settings** > **Display** > **Auto-rotate screen**.
- You can also access the screen rotation control by sliding down the status bar twice and touching **Auto-rotate** or **Portrait**.

Getting to Know Your Phone

* You can switch the positions of the **Back** key and **Recent apps** key. From the home screen, touch  > **Settings** > **Navigation key** and select one option.

** Supports CTIA headsets only.

Key Functions

Key	Description
Power key	<ul style="list-style-type: none">• Press and hold to turn airplane mode on or off, restart, or to power off.• Press to turn the screen on or off.
Home key	<ul style="list-style-type: none">• Touch to return to the home screen from any application or screen.• Touch and hold to access Google Search.
Recent apps key	Touch to see recently used applications.
Back key	Touch to go to the previous screen.
Volume keys	Press or hold to turn the volume up or down.

Getting to Know the Home Screen

The home screen is the starting point for your phone's applications, functions, and menus. You can customize your home screen by adding shortcuts, folders, widgets, and more.

Extended Home Screen Panels

Your home screen is extendable, providing more space for shortcuts, widgets, and more. Simply swipe left or right on the home screen to see the extended panels. You can add or remove home screen panels, or adjust their order.

To add a new home screen panel:

If you are not already using the maximum number of home screen panels for your phone, you can add more panels when adding a shortcut or widget to the home screen. See [Add Shortcuts](#) and [Add Widgets](#).

To delete a home screen panel:

1. Touch and hold an empty area of the home screen. You can slide left or right to view the home screen thumbnails.
2. Touch  on the top right corner of a thumbnail.
3. Touch **OK**. The items on the panel will also be removed.

To adjust the order of a home screen panel:

1. Touch and hold an empty area of the home screen. You can slide left or right to view the home screen thumbnails.
2. Touch and hold a thumbnail and drag it left or right to the place you need.

NOTE:

Touch  at the bottom of a home screen thumbnail to set it as the main home screen.

Personalizing

Changing the System Language

1. From the home screen, touch  > **Settings > Language & input > Language.**
2. Touch a language in the list to set it as the system language.

Setting the Date and Time

1. From the home screen, touch  > **Settings > Date & time.**
2. Set the date, time, time zone, and time format.
 - ▶ To adjust the date and time automatically, touch to turn on **Automatic date & time.**
 - ▶ To adjust the date and time manually, touch to turn off **Automatic date & time** and touch **Set date / Set time** to change the date and time.
 - ▶ To adjust the time zone automatically, touch to turn on **Automatic time zone.**
 - ▶ To adjust the time zone manually, touch to turn off **Automatic time zone** and touch **Select time zone** to set the correct time zone.
 - ▶ To adjust the time format, touch to turn on or off **Use 24-hour format.**

Changing the Ringtone and Notification Sound

You can quickly customize the default ringtone for incoming calls and the default notification sound.

1. From the home screen, touch  > **Settings > Sound & notification**.
2. Touch **Phone ringtone** or **Default notification ringtone**.
3. Scroll through the list and select the ringtone you'd like to use.
4. Touch **OK**.

Turning System Sounds On/Off

1. From the home screen, touch  > **Settings > Sound & notification > Other sounds**.
2. Touch the switch beside each option to turn it on or off. Touch **Emergency tone** to select alert, vibration, or silence for emergency alerts.

Adjusting Volumes

1. From the home screen, touch  > **Settings > Sound & notification**.
2. Drag the sliders below **Media volume**, **Alarm volume**, **Ring volume**, and **Notification volume** to adjust the volume for each type of audio.

NOTE:

You can adjust the media volume when a media application is in use by pressing the **Volume** keys. If no media application is active, press the **Volume** keys to adjust ringtone volume (or the earpiece volume during a call).

Switching to Silent or Vibration Mode

You can set the phone to silent or vibration mode by using one of the following methods.

- Press the **Volume** keys when no media application is active to show the volume management window. Drag the slider to the left or keep pressing the **Volume down** key to switch the phone to vibration mode. Press the key again in vibration mode to switch the phone to silent mode.
- Swipe down from the top of the screen to open the notification panel and drag the panel downwards. Touch **Sound** or **Vibrate** to switch the phone to vibration or silent mode.
- From the home screen, touch  > **Settings > Sound & notification > Notification mode** and select **Vibrate** or **Mute** to switch to vibration or silent mode.

NOTE:

To restore normal sound settings, press or hold the **Volume up** key.

Using Do Not Disturb Mode

You can limit interruptions with Do not disturb mode. This mode silences your phone so that it doesn't make sounds or vibrate when you don't want it to.

To turn on Do Not Disturb mode:

1. From the home screen, touch  > **Settings > Sound & notification > Do not disturb.**
2. Touch **Do not disturb** and select **Always** or **Scheduled**.
3. Set the detailed settings.
 - ▶ If you have selected **Scheduled**, set the days and start/end time you'd like your phone to be in Do not disturb mode.
 - ▶ Touch **Disturb rules** to choose if you'd like to allow certain notifications or not.
 - **Priority only:** Only notifications marked as priority are allowed.
 - **Alarms only:** Only alarms are allowed.
 - **Total silence:** No notifications are allowed.
 - ▶ If you have allowed priority interruptions, you can customize the types of allowed sounds or vibration in the **Priority interruptions** section.

NOTE:

To turn off Do not disturb mode quickly, press the **Volume up/down** key and then touch **END NOW**.

To set exceptions for Do Not Disturb mode:

You can set reminders, certain calls and messages as exceptions when Do not disturb mode is on and **Priority only** is selected as the disturb rule, so these ringtones, sounds and vibration are not turned off.

1. From the home screen, touch  > **Settings > Sound & notification > Do not disturb.**
2. Touch the switches next to the items you want to allow. Touch **Messages** or **Calls** and set who can alert you of their messages or calls.

NOTE:

To set exceptions based on apps, from the home screen, touch  > **Settings > Apps.** Select an app, touch **Notifications**, and switch on **Treat as priority.**

Applying New Wallpapers

You can set the wallpaper for the home screen or lock screen.

1. From the home screen, touch  > **Settings > Display > Wallpaper.**
2. Touch **Gallery, Live Wallpapers, Photos, or Wallpapers** and select an image or an animation.
3. Set the selected image or animation as the wallpaper.
 - ▶ For Gallery images, zoom in or out with two fingers to select the area you need. Touch , , or  to assign the image as the home screen or lock screen wallpaper or both. Touch  to finish the setting.

- ▶ For Live Wallpapers or Wallpapers, just touch **Set wallpaper**.
- ▶ For Photos images, zoom in or out with two fingers to select the area you need and touch **Set wallpaper**.

 **NOTE:**

In addition, you can touch and hold an empty place on the home screen, touch **Wallpapers** and then touch an option to select the wallpaper. If necessary, touch **Set wallpaper**.

Setting the Theme

1. Touch and hold an empty place on the home screen.
2. Touch **Themes**.
3. Touch a theme to select it.

Setting the Home Screen Transition Effect

1. Touch and hold an empty place on the home screen.
2. Touch **Effects**.
3. Touch an effect and the phone will demonstrate how it works. When you have found one you like, touch the **Home** key to exit.

Changing Screen Brightness

1. From the home screen, touch  > **Settings** > **Display** > **Brightness level**.
2. Drag the slider to manually adjust the screen brightness.

NOTE:

With the proximity and light sensor, your phone can automatically adjust the screen brightness for available light. Touch **Adaptive brightness** in the Display settings screen to turn the feature on or off.

Protecting Your Phone With Screen Locks

You can protect your phone by creating a screen lock. When it is enabled, you can touch and hold a blank area on the screen, and then draw a pattern or enter a numeric PIN or password to unlock the phone's screen and keys.

1. From the home screen, touch  > **Settings** > **Security** > **Screen lock**.
2. Touch **None**, **Long press**, **Pattern**, **PIN**, or **Password**. For Pattern, PIN, or Password lock, choose whether you want to further protect your phone with the screen lock before it starts up, and then touch **CONTINUE**.
 - ▶ Touch **None** to disable screen lock protection.
 - ▶ Touch **Long press** to enable screen lock and allow unlocking with a 'touch and hold' gesture. You can unlock

the screen by touching and holding a blank area on the lock screen.

- ▶ Touch **Pattern** to create a pattern that you must draw to unlock the screen.
 - ▶ Touch **PIN** or **Password** to set a numeric PIN or a password that you must enter to unlock the screen.
3. For Pattern, PIN, or Password lock, select how you would like notifications and their contents to show when the phone is locked. Then touch **DONE**.

NOTES:

- Screen lock options are listed in the approximate order of the strength of their security, starting with **None** and **Long press**, which provide no security. A pattern provides minimal security, although it can be more convenient than the stronger options.
- Remember the pattern, PIN or password you set. Otherwise, you will have to upgrade the phone software to use the phone.

Protecting Your Phone With Screen Pinning

You can use the screen pinning feature to keep an app in view, so others cannot switch to other apps or access your personal information.

Turn On Screen Pinning

1. From the home screen, touch  > **Settings** > **Security** > **Screen pinning**.
2. Touch the **On/Off** switch.
3. Touch **YES**.
4. If you have set a screen lock, you can touch **Ask for unlock pattern/PIN/password before unpinning**. You will need to draw the pattern or enter the PIN/password to unpin the screen.

Pin a Screen

1. Ensure that screen pinning is turned on.
2. Open the app you want to keep in view.
3. Touch the **Recent apps** key.
4. If there are many app tabs, swipe up to find  on the front-most tab.
5. Touch .

Unpin the Screen

1. To unpin the screen and return to normal use, touch and hold the **Recent apps** key.
2. If you have enabled **Ask for unlock pattern/PIN/password before unpinning** when pinning the screen, touch and hold on the lock screen and draw the pattern or enter the PIN/password.

Knowing the Basics

Monitoring the Phone Status

The status bar at the top of the home screen provides phone and service status icons on the right side. Below are some of the icons you may see.

Indicators and Icons

Indicator	What it means	Indicator	What it means
	3G data service		No signal
	4G LTE data service		Signal strength
	Do not disturb mode on (Alarms only or Priority only)		Airplane mode
	Do not disturb mode on (Total silence)		Bluetooth on
	Vibration on		Connected to a Wi-Fi network
	Ringer off		Speaker on
	Battery low		Phone microphone off
	Battery full		GPS on
	Battery charging		Wired headset connected
	Alarm set		

Managing Notifications

Notification Icons

The status bar at the top of the home screen provides notification icons on the left side. Below are some of the icons you may see.

Indicators and Icons

Indicator	What it means	Indicator	What it means
	New text or MMS message(s)		Upcoming event
	New voicemail		New Wi-Fi network detected
	New email message(s)		Downloading / receiving data
	New Gmail message(s)		Uploading / sending data
	Missed call		USB connected
	Call in progress		Song playing
	microSDHC card mounted		Updates available from Play Store

Open/Close the Notification Panel

Notifications report the arrival of new messages, calendar events, and alarms, as well as ongoing events. You can open the notification panel to view the details of notifications.

- To open the notification panel, swipe your finger down from the top of the screen.
- To close the notification panel, swipe your finger up from the bottom of the screen or touch the **Back** key.

Respond to or Remove a Notification

In the notification panel, you can respond to a notification or remove the notifications. The notification panel also supports expandable notifications that let you perform additional actions right from the notification itself.

- To respond to a notification, touch it.
- Slide down with one finger to expand certain notifications. You can also swipe two fingers vertically or pinch-zoom to expand or collapse certain notifications.
- To remove a notification, swipe it left or right.
- To remove all non-persistent notifications, touch  below all the notifications.
- To manage notifications you have received, touch and hold a notification and touch  to manage app notification options. See [Apps](#).

NOTE:

If you block notifications for an app, you may miss its important alerts and updates.

Use Quick Settings

The quick settings make it convenient to view or change the most common settings for your phone.

Open the notification panel and you can find a few quick settings on the top. To open the quick settings panel and find all setting tiles, drag the notification panel downwards, touch , or swipe down from the top of the screen with two fingers.

To turn on or off settings quickly:

1. Swipe down from the top of the screen with two fingers to open the quick settings panel.
2. To turn on or off a setting, touch its tile. Touch and hold certain tiles to access more setting options. For example, touch and hold the Wi-Fi tile to open Wi-Fi settings.

To customize the quick settings panel:

You can move the tiles on the quick settings panel.

1. Open the quick settings panel.
2. Touch  at the top.
3. Touch and hold a tile and drag it to the position you want.

NOTE:

On the quick settings panel, touch  at the top to get to the Settings menu.

Managing Shortcuts and Widgets

Add Shortcuts

1. From the home screen, touch  to add shortcuts.
2. Slide to browse the available applications.
3. Touch and hold an application icon and drag it to a home screen panel.

NOTE:

When no existing panel is empty, you can hold the icon and drag it to the right edge of the screen to create a new home screen panel and put the shortcut on it.

Add Widgets

1. Touch and hold an empty area of the home screen and select **Widgets**.
2. Slide to browse the available widgets.
3. Touch and hold a widget and drag it to a home screen panel.

NOTE:

When no existing panel is empty, you can hold the widget and drag it to the right edge of the screen to create a new home screen panel and put the widget on it.

Move Shortcuts or Widgets

1. Touch and hold a shortcut or widget on the home screen.
2. Drag it to the place you need.

Remove Shortcuts or Widgets

1. Touch and hold a shortcut or widget on the home screen.
2. Drag it to  to remove it.

Adjust Widget Size

1. Touch and hold a widget on the home screen and then release it.
2. An outline appears around the widget. Drag the outline to resize the widget.

NOTE:

Not all widgets can be resized.

Organizing With Folders

You can create folders on the home screen and add several shortcuts to a folder.

You can move or remove folders the same way as moving or removing shortcuts.

1. On the home screen, touch and hold the shortcut you want to add into a folder.
2. Drag the shortcut to . A new folder will be created and the shortcut is added into the folder.
3. To add more shortcuts into the folder, touch and hold each shortcut and drag it over the folder before releasing it.

To remove a shortcut from a folder, touch the folder to open it. Touch and hold the shortcut and drag it to the home screen.

NOTE:

Touch the folder and then touch the name field to rename the folder.

Rearranging the Primary Shortcuts

The home screen includes a customizable primary shortcuts area at the bottom visible from all home screens. You can keep at most four shortcuts or folders in the primary shortcuts area. Drag shortcuts or folders in or out of the area to rearrange the area.

Entering Text

You can enter text using the onscreen keyboard. Some apps open it automatically. In others, you open it by touching where you want to type. You can touch the **Back** key to hide the onscreen keyboard. You can also enter text by speaking with the Google voice typing feature.

Enable or Disable Input Methods

1. From the home screen, touch  > **Settings** > **Language & input** > **Current Keyboard** > **CHOOSE KEYBOARDS**.
2. Touch **Manage keyboards**.
3. Touch a keyboard or input method in the list to enable/disable it as an option for entering text.

Change Input Methods

1. When you use the onscreen keyboard to enter text, the  icon appears in the status bar.
2. Open the notification panel and touch **Change keyboard**.
3. Select the input method you need.

Google Keyboard

The Google keyboard provides a layout similar to a desktop computer keyboard. When screen auto-rotation is enabled, turn the phone sideways and the keyboard will change from portrait to landscape. The landscape keyboard is not supported in all applications.

- Touch the alphabetic keys to enter letters. Touch and hold some specific keys to enter associated accented letters or numbers. For example, to enter **É**, touch and hold **E³** and the available accented letters and number 3 appear. Then slide to choose **É**.

- As you enter a word, candidates appear above the keyboard. Touch to select the correct one; touch and hold to remove suggestions.
- Touch  to use uppercase. Double-tap  to lock uppercase. This key also changes to indicate the current case you are using:  for lowercase,  for uppercase, and  when locked in uppercase.
- Touch  to delete the text before the cursor.
- Touch  to select numbers and symbols. You can then touch  to find more.
- Touch  to enter emoji or emoticon.
- Touch  to use Google voice typing.
- Touch and hold  to change the input languages or set up the Google keyboard.
- Touch and hold  and then slide to  to change to a smaller keyboard for easier one-handed typing. Touch  to switch to the right-hand or left-hand keyboard, respectively, or touch  to switch back to the full-sized keyboard.
- Move your finger from letter to letter on the keyboard to trace a word without lifting the finger.

 **NOTE:**

To turn the word tracing feature (gesture typing) on or off, touch and hold  on the Google keyboard and touch **Gesture typing > Enable gesture typing**.

TouchPal Keyboard

The TouchPal keyboard offers three layouts including Full, Phonepad, and T+. You can touch  to select a language and layout.

You can also use Curve® and Wave™ to speed up text input by moving your finger from letter to letter or word from word without lifting the finger.

- The Full layout offers an input experience similar to a computer keyboard.
- The Phonepad layout is similar to a phone pad. Touch an alphabetic key repeatedly until the desired letter appears. Touch and hold the key and slide left or right to choose the letter or number you need.
- In T+ layout, touch to enter the left letter on a key. Double-tap or flick right to enter the right letter/symbol on a key. You can also touch and hold a key and slide to choose more letters and symbols.
- To use gesture typing, touch  on the keyboard to select **Settings > Smart input** and check **Curve – Word gesture**. Then you can move your finger from letter to letter on the keyboard to trace a word without lifting the finger.
- To use sentence gesture entering, touch  on the keyboard to select **Settings > Smart input** and check **Wave - Sentence gesture**. Then after entering one word, you can drag candidate words to the space key to add the word to the text field.

NOTE:

Curve and Wave is only available in the Full layout.

Google Voice Typing

Google voice typing uses the Google voice recognition service to convert speech to text.

1. Touch  when you are using Google keyboard.
- or -
Touch  > **Voice** when you are using the TouchPal keyboard.
- or -
Slide the status bar down when entering text and touch **Change keyboard > Google voice typing**.
2. When you see the microphone image, speak what you want to type. The phone will display the transcription.
3. Continue entering text or touch **Delete** to cancel the last dictated text.

Editing Text

- **Move the insertion point:** Touch where you want to type. The cursor blinks in the new position, and a tab appears below it. Drag the tab to move the cursor.
- **Select text:** Touch and hold or double-tap within the text. The nearest word highlights, with a tab at each end of the selection. Drag the tabs to change the selection.

- **Cut or copy:** Select the text you want to manipulate. Then touch **CUT** or **COPY** to cut or copy the text to the clipboard.
- **Replace text with the clipboard text:** Select the text you want to replace. Then touch **PASTE**.
- **Insert clipboard text to the text field:** Touch the tab below the cursor. Then touch **PASTE**.

Uninstalling or Disabling an App

1. From the home screen, touch  to open the application list screen.
2. Touch and hold an application icon and drag the icon to  or  at the top of the screen.
3. Touch **OK** to uninstall or disable the app.

NOTES:

- Not all apps can be uninstalled or disabled.
- To find the disabled applications, from the home screen, touch  > **Settings** > **Apps** and touch  > **Disabled**. You can then touch an application and touch **ENABLE** to enable it.

Connecting to Networks and Devices

Connecting to Mobile Networks

Control Mobile Data Use

1. From the home screen, touch  > **Settings** > **Mobile networks**.
2. Slide the **Data Enabled** switch to enable or disable mobile data use.

Select Preferred Network Type

1. From the home screen, touch  > **Settings** > **Mobile networks** > **Preferred network type**.
2. Touch the type of network you prefer to connect to.

Check Access Point Names

You can use the default Access Point Names (APNs) to connect to the Internet. From the home screen, touch  > **Settings** > **Mobile networks** > **Access Point Names** to check the default APN.

NOTE:

To set the APN to default settings, touch  > **Reset to default**.

Connecting to Wi-Fi

Wi-Fi is a wireless networking technology that can provide Internet access at distances of up to 300 feet (100 meters), depending on the Wi-Fi router and your surroundings.

Turn Wi-Fi On and Connect to a Wi-Fi Network

1. From the home screen, touch  > **Settings** > **Wi-Fi**.
2. Slide the **Wi-Fi** switch to the **On**  position to turn on Wi-Fi.
3. Touch a network name to connect to it.
4. If the network is secured, enter the password and touch **CONNECT**.

NOTE:

Your phone automatically connects to previously used Wi-Fi networks when they are in range.

Get Notified of Open Networks

1. From the home screen, touch  > **Settings** > **Wi-Fi**.
2. Slide the **Wi-Fi** switch to the **On**  position.
3. Touch  > **Advanced**.
4. Slide the **Network notification** switch to the **On**  position.

When Wi-Fi is on, you receive notifications in the status bar when

your phone detects an open Wi-Fi network. Switch off this option to turn off notifications.

Add a Wi-Fi Network

You can add a Wi-Fi network if the network does not broadcast its name (SSID), or add a Wi-Fi network when you are out of range.

To connect to a secured network, you first need to get the security details from the network's administrator.

1. From the home screen, touch  > **Settings** > **Wi-Fi**.
2. Slide the **Wi-Fi** switch to the **On**  position.
3. Touch  > **Add network**.
4. Enter the network SSID (name). If necessary, enter security or other network configuration details.
5. Touch **SAVE**.

Forget a Wi-Fi Network

You can make your phone forget the details of a Wi-Fi network that you added - for example, if you don't want the phone to connect to it automatically or if it is a network that you no longer use.

1. From the home screen, touch  > **Settings** > **Wi-Fi**.
2. Slide the **Wi-Fi** switch to the **On**  position.
3. Touch  > **Saved networks**.
4. Touch the Wi-Fi network name and then touch **FORGET**.

Connect to a WPS Network

Wi-Fi Protected Setup (WPS) is a feature that makes it easy to add your phone to the access points which support WPS.

You can use one of the following methods to connect your phone to a wireless network using WPS.

Method one: WPS button (Recommended)

1. From the home screen, touch  > **Settings** > **Wi-Fi**.
2. Slide the **Wi-Fi** switch to the **On**  position.
3. Touch  > **Advanced** > **WPS Push Button**.
4. Press the WPS button on the wireless router and the access point will recognize your phone and add it to the network.

Method two: PIN

1. From the home screen, touch  > **Settings** > **Wi-Fi**.
2. Slide the **Wi-Fi** switch to the **On**  position.
3. Touch  > **Advanced** > **WPS Pin Entry**.
4. The WPS PIN displays on the screen. Enter the PIN into the access point's setup page.

After entering the PIN, your phone automatically finds the access point and configures the connection.

NOTE:

For detailed information about the WPS feature of the access point, please refer to its documentation.

Adjust Advanced Wi-Fi Settings

1. From the home screen, touch  > **Settings** > **Wi-Fi**.
2. Touch  > **Advanced** to adjust the following settings.
 - ▶ **Network notification:** Get notifications in the status bar when Wi-Fi is on and an open network is available.
 - ▶ **Scanning always available:** Choose whether to allow Google's location service and other apps to scan for networks, even when Wi-Fi is off.
 - ▶ **Passpoint:** Choose whether to automatically connect to Passpoint-certified Wi-Fi hotspots.
 - ▶ **Keep Wi-Fi on during sleep:** Choose whether or not to keep Wi-Fi on in sleep mode.
 - ▶ **Install certificates:** Install certificates needed for connecting to certain Wi-Fi networks.
 - ▶ **Wi-Fi Direct:** Connect directly to other Wi-Fi Direct devices.
 - ▶ **WPS Push Button:** Connect to a WPS network via the push button method.
 - ▶ **WPS Pin Entry:** Connect to a WPS network via the phone PIN method.
 - ▶ **MAC address:** Check the MAC address.
 - ▶ **IP address:** Check the phone's IPv4 and IPv6 address.

Using Wi-Fi Direct

Wi-Fi Direct allows Wi-Fi devices to share files and data directly by connecting to each other without the need for wireless access points (hotspots).

Connect to Another Device via Wi-Fi Direct

1. From the home screen, touch  > **Settings** > **Wi-Fi**.
2. Slide the **Wi-Fi** switch to the **On**  position.
3. Touch  > **Advanced** > **Wi-Fi Direct**. Your phone will search for other devices enabled with Wi-Fi Direct connections.
4. Touch a device with which to connect below **Peer devices**.
5. Accept the connection on the other device.

Send Data via Wi-Fi Direct

1. Open the appropriate application and select the file or item you want to share.
2. Select the option for sharing via Wi-Fi Direct. The method may vary by application and data type.
3. Touch a device the phone has connected with or wait for it to search for new devices and touch one of them.

Connecting to *Bluetooth* Devices

Bluetooth is a short-range wireless communication technology. Phones or other devices with *Bluetooth* capabilities can exchange information wirelessly within a distance of about 30 feet (10 meters).

The *Bluetooth* devices must be paired before the communication is performed.

Turn *Bluetooth* On/Off

1. From the home screen, touch  > **Settings** > **Bluetooth**.
2. Slide the **Bluetooth** switch to the **On**  or **Off**  position.

When *Bluetooth* is on, the  icon appears in the status bar.

Change the Device Name

1. From the home screen, touch  > **Settings** > **Bluetooth**.
2. Slide the **Bluetooth** switch to the **On**  position if *Bluetooth* is off.
3. Touch  > **Rename this device**.
4. Edit the name and touch **RENAME**.

Pair With Another *Bluetooth* Device

1. From the home screen, touch  > **Settings** > **Bluetooth**.
2. Slide the **Bluetooth** switch to the **On**  position if *Bluetooth* is off.

Your phone automatically scans for and displays the IDs of all available *Bluetooth* devices in range. Touch  > **Refresh** if you want to scan again.

3. Touch the device you want to pair with.

4. If necessary, confirm that the *Bluetooth* passkeys are the same between the two devices and touch **PAIR**. Alternately, enter a *Bluetooth* passkey and touch **PAIR**.

Pairing is successfully completed when the other device accepts the connection or the same passkey is entered.

NOTE:

The *Bluetooth* passkey may be fixed for certain devices, such as headsets and hands-free car kits. You can try entering 0000 or 1234 (the most common passkeys), or refer to the documents for that device.

Forget a *Bluetooth* Device

You can make your phone forget its pairing connection with another *Bluetooth* device. To connect to the device again, you need to search it and enter or confirm a passkey again.

1. From the home screen, touch  > **Settings** > **Bluetooth** and ensure that *Bluetooth* is turned on.
2. In the list of paired devices, touch  beside the *Bluetooth* device you want to forget.
3. Touch **FORGET**.

Send Data via *Bluetooth*

1. Open the appropriate application and select the file or item you want to share.
2. Select the option for sharing via *Bluetooth*. The method may vary by application and data type.

3. Touch a *Bluetooth* device the phone has paired with or wait for it to search for new devices and touch one of them.

Receive Data via *Bluetooth*

1. Turn *Bluetooth* on before trying to receive data via *Bluetooth*.
2. Touch **ACCEPT** to start receiving the data. If necessary, swipe down on the status bar, and touch **ACCEPT** on the *Bluetooth* sharing notification.

Depending on your storage setting and whether a microSDHC card is installed, received files are stored automatically in a dedicated folder (*Bluetooth*, for instance). You can access them with the File Manager app.

Connecting to Your Computer via USB

You can connect your phone to a computer with a USB cable and transfer music, pictures, and other files in both directions. Your phone stores these files in the internal storage or on a removable microSDHC card.

Connect Your Phone to a Computer via USB

1. Connect your phone to the PC with a USB cable.
2. Choose one of the following options:
 - ▶ **Charge only:** Charge your phone via USB.
 - ▶ **Install driver:** Install the driver needed for some USB connection modes (such as MTP). You only need to install the driver on the same PC once.

 **NOTE:**

You can also install the driver on PC by running the executable file in the new CD-ROM drive.

- ▶ **Media device (MTP):** Transfer files on Windows® PC or Mac®.

 **NOTE:**

For Windows XP, install the drivers and Windows Media® Player 11 (or later version) when you use Media device (MTP) for the first time.

- ▶ **Camera (PTP):** Transfer photos using camera software.

 **NOTE:**

To make your phone connect to the computer automatically using the selected connection type, check **Don't ask me again**.

Disconnect Your Phone From the Computer

To disconnect the phone from the computer, simply unplug the USB cable when you're finished.

Using the microSDHC Card as Portable or Device Storage

You can use your microSDHC card as portable storage when there's already content such as your media and other files so that you don't lose them.

If your microSDHC card is new or doesn't have content you want to keep, you can also set it up as an extension of the device

storage, and this requires formatting that prevents the microSDHC card from working with other devices.

! **CAUTION:**

As part of the device storage, the microSDHC card may have data on it that is necessary for some apps to function normally. Therefore, do not remove or replace the card randomly.

Set Up the microSDHC Card as Portable Storage

When you install a microSDHC card that has not been used on your phone before, the phone will mount the card as portable storage by default.

To remove the microSDHC card from your phone:

If you need to remove the microSDHC card used as portable storage while the phone is on, you must unmount it first.

1. From the home screen, touch  > **Settings** > **Storage**.
2. Touch  next to the microSDHC card name in the Portable storage section.
3. When the screen prompts the card is safely ejected, you can remove it from the phone.

To erase and format the microSDHC card:

1. From the home screen, touch  > **Settings** > **Storage**.
2. Touch the microSDHC card name in the Portable storage section.
3. Touch **Format**.
4. Touch **ERASE & FORMAT**.

CAUTION:

The formatting procedure erases all the data on the microSDHC card, after which the files CANNOT be retrieved.

Set Up the microSDHC Card as Device Storage

If your microSDHC card is new or doesn't have content you want to keep, you can format the card and use it as part of the device storage. If you move the microSDHC card to another device, it'll be formatted before it can be used.

1. From the home screen, touch  > **Settings** > **Storage**.
2. Touch the microSDHC card name in the Portable storage section.
3. Touch **Format as internal**.
4. Touch **ERASE & FORMAT**.

CAUTION:

The formatting procedure erases all the data on the microSDHC card, after which the files CANNOT be retrieved.

5. The phone will prompt you to move your photos, files and other data from the phone to the microSDHC card. Select **Move now** or **Move later** and touch **NEXT**. Follow the onscreen instructions to continue.

To move data between the phone and the microSDHC card:

With the microSDHC card as part of the device storage, you can move your photos, files and other data between the phone and the card any time.

1. From the home screen, touch  > **Settings > Storage**.
2. To move data from the phone to the microSDHC card, touch the name of the card; to move data from the card to the phone, touch **Phone**.
3. Touch **Migrate data**.
4. Touch **MOVE**.

 **NOTE:**

Whenever you move data between the internal storage and the microSDHC card, the destination is used to save new apps and personal data (such as photos and videos) and only the destination is accessible from a computer.

To remove the microSDHC card from your phone:

If you need to remove the microSDHC card used as device storage while the phone is on, you must unmount it first.

1. From the home screen, touch  > **Settings > Storage**.
2. Touch your microSDHC card name below **Device storage**.
3. Touch **Eject**.

 **NOTE:**

Before ejecting the card, ensure that you have moved data and apps to the phone.

4. Touch **EJECT**.
5. When the screen prompts the card is safely ejected, you can remove it from the phone.

To reformat the microSDHC card as portable storage:

If you no longer want to use your microSDHC card as device storage, you can reformat the card as portable storage.

 **NOTE:**

Before the formatting, ensure that you have moved data and apps to the phone.

1. From the home screen, touch  > **Settings** > **Storage**.
2. Touch your microSDHC card name below **Device storage**.
3. Touch **Format as portable**.
4. Touch **FORMAT**.

 **CAUTION:**

The formatting procedure erases all the data on the microSDHC card, after which the files CANNOT be retrieved.

Connecting to Virtual Private Networks

Virtual private networks (VPNs) allow you to connect to the resources inside a secured local network. VPNs are commonly deployed by corporations, schools, and other institutions to let people access local network resources when not on campus, or when connected to a wireless network.

Depending on the type of VPN you are using, you may be required to enter your login credentials or install security certificates before you can connect to your VPN. You can get this information from your network administrator.

 **NOTE:**

You need to set a lock screen pattern, PIN, or password before you can use credential storage (VPN).

Add a VPN

1. From the home screen, touch  > **Settings** > **More** > **VPN**.
2. Touch  and enter the VPN name.
3. Enter the server address and other information provided by your network administrator. Swipe up and check **Show advanced options** to fill out additional details.
4. Touch **SAVE**.

The VPN is added to the list on the VPN screen.

Connect to a VPN

1. From the home screen, touch  > **Settings** > **More** > **VPN**.
2. Touch the VPN that you want to connect to.
3. When prompted, enter any requested credentials and then touch **CONNECT**.

Modify a VPN

1. From the home screen, touch  > **Settings** > **More** > **VPN**.
2. Touch  beside the VPN that you want to modify.
3. Edit the VPN settings and then touch **SAVE**.

Phone Calls

You can place calls from the Phone app, the Contacts app, or other apps or widgets that display contact information. Wherever you see a phone number, you can usually touch it to dial.

Placing and Ending Calls

Place a Call by Dialing

1. From the home screen, touch  > .
2. Enter the phone number or the contact name with the on-screen keypad. Touch  to delete incorrect digits.

 **NOTE:**

As you enter the phone number or the contact name, your phone searches for contacts that match. If you see the number and contact you want to dial, touch it to place the call immediately.

3. Touch  below the keypad to dial.

You can also touch the search box at the top of the Phone app screen and enter the phone number or contact name you want to call. Touch the matching contact or **Call [number]** to place the call.

 **NOTES:**

- To make an international call, touch and hold the **0** key to enter the plus (+) symbol. Next, enter the country code, followed by the city/area code and then the phone number.

- To redial the last call you made, just touch the **Home** key >  >  >  and touch  again.

End a Call

During a call, touch  on the screen.

Answering or Rejecting Calls

When you receive a phone call, the incoming call screen opens, displaying the Caller ID or the information about the caller that you've entered in the Contacts app. You can answer or reject the call, or reject it with a text message.

Answer a Call

When you receive a phone call, slide  down to answer the call.

NOTE:

To silence the ringer before answering the call, you can press the **Volume up/down** key or the **Power** key, or touch the **Back** key, the **Recent apps** key, or the **Home** key.

Reject a Call

When you receive a phone call, you can:

Slide  up to reject the call.

- or -

Slide  up from the bottom of the screen to reject the call and select a preset text message or edit one to send to the caller.

NOTE:

To edit the preset text response from within the Phone app, touch  > **Settings** > **Quick responses**.

Working With the Call History

The call history is a list of all the calls you've placed, received, or missed. It provides a convenient way to redial a number, return a call, or add a number to your Contacts.

To open the call history, you can touch the **Home** key >  >  > **Call History**.

Place a Call From the Call History

1. Open the call history.
2. Touch a number for more information about the call, or touch  beside it to call back.

NOTE:

You can touch **MISSED**, **OUTGOING**, or **INCOMING** to filter the records by call type.

Add a Call History Number as a Contact

1. Open the call history.
2. Touch the circle in front of a number.
3. Touch  on the contact information tab.
4. To add the number to an existing contact, touch a contact in the list. To add a new contact, touch **Create new contact**.

Take Other Actions on a Call History Entry

1. Open the call history.
2. Touch a listing and then touch **Call details** to view more call information. While viewing the call details, you can:
 - ▶ Touch  to delete the entry.
 - ▶ Touch  to call the number.
 - ▶ Touch  > **Edit before call** to edit the number in the dialer before calling it.
 - ▶ Touch the circle in front of an entry to open the contact information tab from the bottom. You can send a message, call back, edit the contact, add the contact to favorites, or add the number to contacts.

NOTE:

You can touch  > **Clear call history** in the call history screen to select and delete the history records.

Calling Your Contacts

1. Touch the **Home** key > . Your favorite contacts and frequently called contacts are displayed in the  tab.
2. Touch a contact to place the call, or touch the  tab and then touch  beside a contact to make a call.

Using Voicemail

If you have set the phone to divert calls to voicemail, callers can leave voicemail messages when they cannot reach you. Here's how to set up and use your phone's voicemail feature.

Set Up Voicemail

You should set up your voicemail and personal greeting as soon as your phone is activated. Always use a password to protect against unauthorized access.

1. Touch the **Home** key >  > .
2. Touch and hold the **1** key in the dialer.
3. Follow the voice prompts to create your password, record your name announcement, and record your greeting.

Retrieve Your Voicemail

When you receive a new voicemail, the phone displays  in the status bar.

1. Touch the **Home** key >  > .
2. Touch and hold the **1** key in the dialer. If prompted, enter your voicemail password.
3. Follow the voice prompts to listen to and manage your voicemail messages.

Using Options During a Call

During a call, you will see a number of on-screen options. Touch an option to select it.

- Touch  to switch to the keypad when you need to enter a code (for example, the PIN for your voicemail or bank account) during the call.
- Touch  to turn the speakerphone on or off.
- Touch  to mute or unmute your microphone.
- Touch  to make another call separately from the first call, which is put on hold.
- Touch  to go to contacts.
- Touch  to merge the separate calls into a single conference call.
- Touch  to put the caller you are speaking to on hold, and switch to the other call that has been put on hold.
- Touch  to end the current call.

WARNING!

Because of higher volume levels, do not place the phone near your ear during speakerphone use.

Managing Multi-party Calls

When the call waiting and three-way call features are available, you can switch between two calls or set up a conference call.

NOTE:

Options and interface may vary. The call waiting and three-way call features need network support and may result in additional charges. Please contact your service provider for more information.

Switch Between Current Calls

When you're on a call, your phone screen informs you that another call is coming in and displays the caller ID.

To respond to an incoming call while you're on a call:

- Touch **Answer** to answer the call. This puts the first caller on hold and answers the second call.
- Touch  to reject the second call.
- Touch  to reject the second call and select a preset text message or edit one to send to the caller.

To switch between two calls:

Touch .

Set Up a Conference Call

With this feature, you can talk to two people at the same time.

1. While you are having a normal call, touch  and dial the second number. This puts the first caller on hold.

2. When you're connected to the second party, touch .
If one of the people you called hangs up during your call, you and the remaining caller stay connected. If you initiated the calls and are the first to hang up, all callers are disconnected.
To end the conference call, touch .

Adjusting Your Call Settings

You can configure a number of settings for the Phone application.

NOTE:

Some call options are displayed only when these features are available, and some features need network support and may result in additional charges. Please contact your service provider for more information.

Set Contact Display Options

You can set the order of the contacts displayed in the  tab of the Phone app.

1. Touch the **Home** key >  >  > **Settings > Display options.**
2. Touch **Sort by** or **Name format** to set the order of the contacts and the format of the contact names.

Set Sound and Vibration

Set the sound and vibration for incoming calls as well as dial pad sounds.

1. Touch the **Home** key >  >  > **Settings** > **Sounds and vibration**.
2. Touch the option you want to configure.
 - ▶ Touch **Phone ringtone** to select the ringtone for incoming call notification.
 - ▶ Check **Also vibrate for calls** to enable vibration for incoming call notification.
 - ▶ Check **Dialpad tones** to play sounds when you touch the dial pad keys.

Edit Quick Response to Rejected Callers

1. Touch the **Home** key >  >  > **Settings** > **Quick responses**.
2. Touch a text message to edit it.
3. Touch **OK** to save the message.

Set Voicemail

1. Touch the **Home** key >  >  > **Settings** > **Call settings**.
2. Touch **Voicemail** to configure voicemail settings.

Set TTY Mode

Your phone is a TTY compatible device. A TTY device can allow people who have hearing or speech disabilities to communicate by telephone. Simply connect the TTY device to the phone's headset jack.

Select a TTY mode for your phone to work with a TTY device, or turn TTY off.

1. Touch the **Home** key >  >  > **Settings > Call settings > TTY mode.**
2. Select one of the following options. Consult your teletypewriter manufacturer's manual if necessary.
 - ▶ **TTY Off:** Users who can hear and talk can disable TTY support.
 - ▶ **TTY Full:** Users who cannot talk or hear may use this mode to send and receive text messages through TTY device.
 - ▶ **TTY HCO:** Users who can hear, but cannot talk, may use this mode to listen to conversation of the other party, and respond via text messages.
 - ▶ **TTY VCO:** Users who can talk, but cannot hear, may use this mode to talk through the phone and receive responses via text messages.

Set Hearing Aids

Your phone supports HAC (Hearing Aid Compatibility) function. When you turn on the hearing aid compatibility and use a hearing aid with a telecoil to answer the phone, it will help you hear more clearly during the phone call.

1. Touch the **Home** key >  >  > **Settings > Call settings.**
2. Check **Hearing aids** to turn on hearing aid compatibility.

CAUTION:

Do not turn on the Hearing aids option unless you use a hearing aid with a telecoil. Using this setting without a hearing aid or with a hearing aid without a telecoil may be harmful to your hearing.

Use Noise Reduction

With noise reduction, your phone can use the microphone on its top to reduce background noise during calls.

1. Touch the **Home** key >  >  > **Settings** > **Call settings**.
2. Check or uncheck **Noise reduction** to enable or disable this feature.

Set Speed Dials

You can touch and hold the 1 - 9 keys from the dialer to call the corresponding speed dial number.

The number 1 key is reserved to speed dial your voicemail.

To assign a speed dial key:

1. Touch the **Home** key >  >  > **Settings** > **Call settings** > **Speed dial**.
2. Touch a speed dial key.
3. Enter a phone number or touch  to select one from the contact list.
4. Touch **OK**.

Set DTMF Tones

You can set the length of dual-tone multi-frequency (DTMF) signal tones.

1. Touch the **Home** key >  >  > **Settings** > **Call settings** > **DTMF tones**.
2. Touch **Normal** or **Long**.

Set Voice Privacy

This option allows you to enable enhanced privacy mode.

1. Touch the **Home** key >  >  > **Settings** > **Call settings**.
2. Check **Voice privacy** to enable this feature.

Set Plus Code Dialing

Plus Code Dialing allows the phone to automatically dial the international access code for your location when you touch and hold the **0** key in the dialpad.

To activate Plus Code Dialing:

1. Touch the **Home** key >  >  > **Settings** > **Call settings** > **Plus code dialing setting**.
2. Check **North American dialing** to enable this feature.

To change the international dialing code:

1. Touch the **Home** key >  >  > **Settings** > **Call settings** > **Plus code dialing setting**.
2. Touch **International dialing**.
3. Enter a new code and touch **OK**.

Use Dial Assist

This option allows the phone to automatically add the prefix or country code for calls to the U.S. when you are on a roaming network.

1. Touch the **Home** key >  >  > **Settings** > **Call settings**.
2. Check or uncheck **Dial assist**.

Contacts

You can add contacts on your phone and synchronize them with the contacts in your Google account or other accounts that support contact syncing.

To see your contacts, touch  on the home screen and touch **Contacts**. From there, you can touch the tabs to quickly switch to favorite contacts and contact groups.

Checking Contact Details

1. From the home screen, touch  > **Contacts** > **CONTACTS**.
2. Scroll through the list to view all your contacts.
3. Touch a contact to view its details.

NOTE:

If you have a lot of contacts stored, drag the slider on the right side of the screen to jump to the contact initial you need.

Adding a New Contact

1. From the home screen, touch  > **Contacts**.
2. Touch  to add a new contact.
3. Enter the contact name, phone numbers or email addresses. Touch **More Fields** to enter other information. If you have multiple account types associated with your phone, touch the

 field and select a contact type. If a sync account is selected, the contacts will be synced automatically with your account online.

4. Touch  to save the contact.

Setting Up Your Own Profile

You can create your own name card in your phone.

1. From the home screen, touch  > **Contacts** > **CONTACTS**.
2. Touch **Set up my profile**. If a profile has already been set up, touch the existing profile below **ME** and touch .
3. Edit your profile information. Touch **More Fields** to add more information if desired.
4. Touch .

Importing, Exporting, and Sharing Contacts

You can import/export contacts from/to the phone storage or installed microSDHC cards. This is especially useful when you need to transfer contacts between different devices. You can also quickly share contacts using Messenger, Email, *Bluetooth*, Google Drive, Gmail, and Wi-Fi Direct.

Import Contacts From the Phone Storage or microSDHC Card

1. From the home screen, touch  > **Contacts**.
2. Touch  > **Import/Export** > **Import from storage**.
3. If prompted, select an account for the imported contacts.
4. Follow the onscreen instructions to complete the import.

Export Contacts to the Phone Storage or microSDHC Card

1. From the home screen, touch  > **Contacts**.
2. Touch  > **Import/Export** > **Export to storage**.
3. The phone will prompt you with the name of the vCard file and the directory in which the file will be saved. Touch **OK** to create the file.

Share Contacts

1. From the home screen, touch  > **Contacts** > **CONTACTS**.
2. Touch  > **Multi-Select**.
3. Touch the contacts you want to share and then touch .
4. Choose how to share the contacts. The options available depend on the applications and services installed.

Working With Favorite Contacts

You can add the contacts you use frequently to **FAVORITES** so that you can find them quickly.

Add a Contact to Favorites

1. From the home screen, touch  > **Contacts** > **CONTACTS**.
2. Touch a contact and then touch  at the top of the screen.

Remove a Contact From Favorites

1. From the home screen, touch  > **Contacts** > **FAVORITES**.
2. Touch a favorite contact and then touch .

Working With Groups

View Your Contact Groups

1. From the home screen, touch  > **Contacts** > **GROUPS**.
2. Scroll through the list to view the preset groups and any groups you have created.
3. Touch a group to view its members.

NOTE:

To send a message or an email to the group members, touch a group >  > **Send group message / Send group email** and touch to select group members to include.

Set Up a New Group

1. From the home screen, touch  > **Contacts > GROUPS**.
2. Touch  to create a new group.
3. If you have added contact accounts other than the phone, select an account for the new group.
4. Touch **Group's name** and enter a name.
5. Touch **Add member** and select the contacts you wish to be the group members.
6. If necessary, touch the field below **RINGTONE**, **NOTIFICATION RINGTONE**, and **VIBRATE PATTERN** to set a special ringtone and vibrate pattern for incoming calls and messages from the group members.
7. Touch  to save the group.

Delete a Group

1. From the home screen, touch  > **Contacts > GROUPS**.
2. Touch a group and then touch  > **Delete Group**.
3. Touch **OK** to disband the group. The contacts in the group will not be deleted.

Edit a Group

1. From the home screen, touch  > **Contacts** > **GROUPS**.
2. Touch a group >  > **Edit**.
3. Touch the group name to edit it, or touch the field below **MEMBER**, **RINGTONE**, **NOTIFICATION RINGTONE**, or **VIBRATE PATTERN** to add more members or change the ringtone/vibration pattern.
4. Touch .

NOTE:

To remove group members, touch a group and then touch  > **Multi-Select** and select the members you would like to remove. Touch  > **OK**.

Searching for a Contact

1. From the home screen, touch  > **Contacts** and then touch  to search.
2. Input the contact name or any information the contact has to search for it. The contacts matched will be listed.

Editing Contacts

Edit Contact Details

1. From the home screen, touch  > **Contacts** > **CONTACTS**.
2. Touch a contact and then touch .
3. Edit the contact and touch .

Join Duplicate Contacts

As your phone synchronizes with multiple online accounts, you may see duplicate entries for the same contact. You can merge all the separate information of a contact into one entry in the Contacts list.

1. From the home screen, touch  > **Contacts** > **CONTACTS**.
2. Touch a contact and then touch .
3. Touch  > **Join**.
4. Touch and hold a contact to select it.
5. Touch the duplicate contact.
6. Touch .

Separate Contact Information

If contact information from different sources was joined in error, you can separate the information back into individual contacts on your phone.

1. From the home screen, touch  > **Contacts**.
2. Touch a joint contact you want to separate.
3. Touch  >  > **Separate**.
4. Touch **OK** to confirm.

Web Accounts

Adding or Removing Accounts

You can add multiple Google accounts and Microsoft Exchange ActiveSync® accounts. You may also add other kinds of accounts, depending on the apps installed on your phone.

Add an Account

1. From the home screen, touch  > **Settings** > **Accounts** > **Add account**.
2. Touch the type of account you want to add.
3. Follow the on-screen steps to enter the information about the account. Most accounts require a username and password, but the details may vary. You may also need to obtain some information from IT support or your system administrator.

When the account is successfully added, it is displayed in the Accounts menu in Settings.

Remove an Account

Removing an account will delete it and all information associated with it, such as emails and contacts, from your phone.

1. From the home screen, touch  > **Settings** > **Accounts**.
2. Touch the account category and then touch the account you'd like to remove.
3. Touch  > **Remove account** > **REMOVE ACCOUNT**.

Configuring Account Sync

Configure Auto Sync Setting

1. From the home screen, touch  > **Settings** > **Accounts**.
2. Touch  and check or uncheck **Auto-sync data** to enable or disable automatic sync.
 - ▶ When automatic sync is turned on, changes you make to information on your phone or on the web are automatically synced with each other.
 - ▶ When automatic sync is turned off, you need to sync manually to collect emails, updates, or other recent information.

Sync Manually

1. From the home screen, touch  > **Settings** > **Accounts**.
2. Touch the account category and then the account you want to sync.
3. Touch  > **Sync now**.

Change an Account's Sync Settings

1. From the home screen, touch  > **Settings** > **Accounts**.
2. Touch the account category and then the account. The Sync screen appears, showing a list of information the account can sync.

3. When Auto-sync is enabled, switch the items on or off as you need. The enabled types of information will be kept in sync automatically between the phone and the web. When Auto-sync data is disabled, touch a listing to sync that type of information between the phone and the web.

Email

Swipe up from the bottom of the home screen and touch **Email**. Use it to read and send emails from Microsoft Exchange ActiveSync, Gmail, Hotmail, Yahoo!®, and more.

Setting Up the First Email Account

1. From the home screen, touch  > **Email**.
2. Select an email server, and then enter the email address and password.
3. Touch **NEXT** to let the phone retrieve the network parameters automatically.

 **NOTE:**

You can also enter these details manually by touching **MANUAL SETUP** or if automatic setup fails.

4. Follow the on-screen instructions to finish the setup.

Your phone will show the inbox of the email account and start to download email messages.

Checking Your Emails

Your phone can automatically check for new emails at the interval you set when setting up the account.

You can also check new emails manually by swiping down on the message list.

Writing and Sending an Email

1. Open your email Inbox and touch .

 **NOTE:**

If you have more than one email account added on the phone, touch the sender line to select the account you want to use for sending the message.

2. Enter a contact name or email address in the **To** field. Separate each recipient with a comma. You can also touch  to select recipients from your contacts.

 **NOTE:**

To send a carbon copy or blind carbon copy to other recipients, touch  beside the **To** field to open the Cc/Bcc field and enter the contact names or email addresses.

3. Enter the email subject and compose the email text.
4. Touch  to add audio files, images, videos and other types of files as attachments.
5. Touch  at the top right of the screen to send the message.

Responding to an Email

You can reply to or forward a message that you receive. You can also delete messages and manage them in other ways.

Replying to or Forwarding an Email

1. Open the email you want to reply to or forward from the Inbox.
2. Choose one of the following:

- ▶ To reply to the sender, touch .
 - ▶ To reply to the sender and all recipients of the original email, touch .
 - ▶ To forward the email, touch .
3. Edit your message and touch .

Mark an Email as Unread

You can return a read email to the unread state - for example, to remind yourself to read it again later. You can also mark a batch of emails as unread.

- While reading a message, touch  > **Mark unread**.
- While in a message list (for instance, the inbox), touch the sender images beside the messages and then touch .

Delete an Email

You can delete an email from its folder. You can also delete a batch of emails.

- While reading a message, touch  > **Delete**.
- While in a message list (for instance, the inbox), slide a message left or right to delete it, or touch the sender images beside the messages and then touch .

NOTE:

If you accidentally delete an email, touch **UNDO** to retrieve it.

Adding and Editing Email Accounts

Add an Email Account

After setting up your first email account (see [Setting Up the First Email Account](#)), you can add more email accounts and manage them separately.

1. Open the Email app.
2. Touch  > **Settings** > **Add account**.
3. Set up the account as you did with the first one.

Edit an Email Account

You can change a number of settings for an account, including how often you check for email, how you're notified of new mails, your email signature, and details about the servers the account uses to send and receive mails.

1. Open the Email app.
2. Touch  > **Settings** and touch the account whose settings you want to change.
3. Make the changes and touch  or the **Back** key when you're finished.

Changing General Email Settings

General settings apply to all email accounts you add.

1. Open the Email app.
2. Touch  > **Settings** > **General settings**.
3. Make the changes and touch  or the **Back** key when you're finished.

Messenger

You can use Messenger to exchange text messages (SMS) and multimedia messages (MMS).

Opening the Messenger Screen

Touch the **Home** key > .

The Messenger screen opens, where you can create a new message, search for messages, or open an ongoing message thread.

- Touch  to write a new text or multimedia message.
- Touch  to search for a message using keywords.
- Touch an existing message thread to open the conversation.

Sending a Message

1. On the Messenger screen, touch .
2. Add recipients in one of the following ways.
 - ▶ Enter the phone number or contact name directly in the “To” field. Touch **Send to <number>** or a match from your contacts displayed below the “To” field to add the number or contact as the recipient.
 - ▶ Touch a contact below the “To” field to whom you want to send the message.
3. Touch .
4. Enter the content of your text message.

5. If you want to send a multimedia message, touch  to add stickers, pictures, audios, videos, your location, or other files to the message.
Touch an attachment to view it (or play it). You can also touch  to delete it.
 6. Touch .
-  **NOTES:**
- If you add two or more recipients, the message may be sent as a group MMS where everyone can reply and see each other's messages. For group message setting, touch  > **Settings > Advanced > Group messaging** from the Messenger screen.
 - You can also include email addresses as recipients for multimedia messages.
 - Do not add any attachment if you want to send a text message. Otherwise you may be charged for a multimedia message.

Replying to a Message

Messages you receive are appended to existing threads of the same number. If the new message comes from a new number, a new thread is created.

1. On the Messenger screen, touch the thread that has the message you want to reply to.
2. Type your reply in the text box at the bottom. You can touch  if you want to reply with an MMS.
3. Touch .

Forwarding a Message

1. On the Messenger screen, touch the thread that has the message you want to forward.
2. Touch and hold the message you would like to forward.
3. Touch  at the top.
4. Touch the contact or number of existing threads or touch **NEW MESSAGE** and enter a recipient for the message.
5. Edit the content if you want.
6. Touch .

Web Browser

Use Browser to view web pages and search for information.

Opening the Browser

From the home screen, touch  > **Browser** to launch the web browser. The browser also opens when you touch a web link - for example, in an email or a text message.

1. Open the Browser app.
2. Touch the address box at the top of the web page.
3. Enter the address (URL) of a web page or enter terms you want to search for.
4. Touch a URL or search suggestion or touch the enter key on the keyboard to open the web page or search results.

NOTE:

Touch the **Back** key or  > **Forward** to go to the previous or the next web page.

Setting the Home Page

Your home page opens when you open Browser after restarting your phone.

1. Open the Browser app.
2. Touch  > **Settings** > **Set homepage**.
3. Enter the URL and touch **OK** to set it as the home page.

Using Multiple Browser Windows

You can open several web pages at the same time (one page in each window) and switch between them freely.

Open a New Browser Window

Touch  > **New tab**. A new browser window opens.

Switch Between Browser Windows

1. Touch the  icon (the number inside indicates the number of existing windows) at the top of the screen. Opened web pages appear as a series of cards.
2. Touch the card you want to open.

NOTE:

Swipe a web page horizontally or touch **X** to close the browser window.

Downloading Files

1. Touch and hold an image or a link to a file or to another web page.
2. In the menu that opens, touch **Save image** or **Save link**.

The downloaded files are saved to your phone. You can view or open them in the Downloads app.

Changing Browser Settings

You can configure a number of settings to customize the way you browse the web, including several that you can use to control your privacy.

To open the Browser settings screen, touch  > **Settings** in the browser screen.

Camera

You can use the camera or video camera to take and share pictures and videos. Your phone comes with a 5 megapixel camera with an autofocus feature and a front-facing camera that lets you capture sharp pictures and videos.

Capturing a Photo

1. Touch the **Home** key > .
2. Aim the camera at the subject and make any necessary adjustment. AUTO (auto camera) mode is used by default.
3. Touch the area where you want the camera to focus, or leave the camera to autofocus on the center of the image.
4. Lightly touch  to take the picture.

- ▶ **Switch view mode:** Switch between the back camera and the front-facing camera lens (for selfies, video chatting, etc.).
- ▶ **Self-timer:** Set a time delay before the camera takes a picture after you touch the shutter icon, or turns off this feature.
- ▶ **Flash:** Select a flash mode for the camera.
- ▶ **Settings:** Change camera and camcorder settings. See [Customizing Camera and Video Settings](#).
- ▶ **Captured picture/video:** View pictures and videos you have captured.
- ▶ **Capture picture:** Touch the icon to take a picture.
- ▶ **Capture video:** Touch the icon to start recording a video.
- ▶ **Switch camera mode:** Select a camera mode when using the back camera. In addition to the default AUTO mode, you can touch **MANUAL** to adjust some advanced professional options, or touch **FUN** to use multi-exposure, filter effects, HDR, smile detection, macro subjects, or interval photo capture modes.

WARNING!

Keep a safe distance when using the flash. Do not point the flash towards the eyes of people or animals.

NOTES:

- You can pinch or spread your fingers on the screen, or press the **Volume up/down** key, to zoom in or out before taking a picture.

- When you use the front camera, you can also touch  to use smile detection.

Using Manual Camera Mode

You can use the Manual camera mode to adjust more camera options for your photo, such as ISO, white balance, and exposure.

1. Touch the **Home** key >  > **MANUAL**.
2. Aim the camera at the subject. You can make the following adjustments.
 - ▶ Drag the green square to any area on the screen that you want to focus on.
 - ▶ Drag the white circle to any area on the screen where you want the camera to meter exposure so as to adjust the photo brightness.
 - ▶ Touch , , , , or  to adjust settings including grid, gradienter, white balance, ISO, and overall exposure.
3. Touch  to take the photo.

Recording a Video

1. Touch the **Home** key > .
2. Aim the camera at the subject and make any necessary adjustments. You can touch any area on the screen that you want the camcorder to focus on before and during recording.

3. Touch  to start recording. You can touch / to pause or resume recording, or touch  to save the frame as a photo.
4. Touch  to stop recording.

 **NOTE:**

You can pinch or spread your fingers on the screen, or press the **Volume up/down** key, to zoom in or out before and during recording.

Customizing Camera and Video Settings

Before capturing a photo or a video, you can touch  to open the following options.

 **NOTE:**

Some camera and video options will change in different camera modes.

CAMERA tab

- **Full screen** (back camera): Choose whether to enable the full-screen preview.
- **Picture size** (front camera mode, manual and some FUN modes): Adjust the resolution for selfies.
- **Point-and-shoot** (front camera): Touch the viewfinder screen to take a selfie.
- **Shutter tone**: Turn the shutter tone on or off.

- **Geo-tagging:** Select whether to store the GPS location in your captured photos and videos.
- **Review:** Automatically display the picture you just captured or turn off the feature.
- **Storage location:** Change the save location for captured photos and videos when a microSDHC card is installed.
- **Restore defaults:** Restore default camera and video settings.

VIDEO tab

- **Video quality:** Set the quality for your video.
- **Time lapse** (back camera): Set the time interval between frames before capturing time-lapse videos, or turn the feature off to record normal speed videos.
- **Focus lock when recording** (back camera): Turn on or off the focus lock for video recording. You cannot touch the screen to adjust the focus during video recording when the feature is enabled.
- **Geo-tagging:** Select whether to store the GPS location in your captured photos and videos.
- **Storage location:** Change the save location for captured photos and videos when a microSDHC card is installed.
- **Restore defaults:** Restore default camera and video settings.

Gallery

Opening Gallery

From the home screen, touch  > **Gallery** to view your pictures and videos.

Working With Albums

When you open Gallery, touch an album to view all pictures and videos on your phone in a number of albums.

View Album Contents

Touch an album to view the pictures and videos it contains.

Share Albums, Pictures, or Videos

1. Touch and hold an album to select it, or after you open an album, touch and hold a picture or video to select it.
2. Touch more items that you want to share.
3. Touch  and select how you want to share the items.

Delete Albums, Pictures, or Videos

1. Touch and hold an album to select it, or after you open an album, touch and hold a picture or video to select it.
2. Touch more items that you want to delete.
3. Touch  > **OK**.

Move/Copy Pictures or Videos

1. Open an album and touch and hold a picture or a video to select it.
2. Touch more items that you want to move or copy.
3. Touch  > **Copy to / Move to**.
4. Touch a destination album or touch **New Album** to name and create a new album as the destination.

Working With Pictures

Touch a picture in an album to view the picture in full screen. Double-tap the picture, or pinch two fingers together or spread them apart to zoom out or in. Slide left or right to view other pictures/videos in the album.

NOTES:

- Pinch a picture or video to make it smaller. You'll then see a filmstrip-style view of all your pictures and videos in a row. Swipe left or right to scan through them all.
- You can delete a picture or video by touching  > **OK** or by swiping it up in the filmstrip view. If you accidentally delete one by swiping it up, touch **UNDO** to retrieve it.
- Not all options are available for certain albums or pictures.

Retouching Your Pictures

You can edit any photos you took and some other pictures in Gallery with Photo Editor. The changed picture is saved in the same album as the original one, while the original is never affected.

1. While viewing a picture in full screen, touch the screen and touch  and choose **Photo Editor**.
2. Touch an option along the bottom of the screen to edit the picture.

Filter	Apply filters, old photo effects or blur effects.
Modify	Crop, rotate, or flip (mirror) the picture.
Adjust	Adjust exposure, contrast, sharpness, and other color/light options.
Doodle	Draw something or add text or mosaics to the picture.
Decoration	Decorate the picture with a frame or stickers.

3. Touch  to keep the change or touch  to cancel it.
4. Touch  to save the new picture.

NOTE:

Touch  in the Photo Editor screen to see the edits you have made and undo or redo them.

Making a GIF or a Collage

You can put together a few pictures in the same album to make an animated GIF or a collage of pictures.

1. Open the Gallery app and touch  > **Gif maker** or **Collage maker**.
2. Touch an album.
3. Touch the pictures you want. You can exit the album and open other albums to add more pictures.
 - ▶ To make a GIF, touch 2 to 50 pictures in the order (or reverse of the order) that you want them to appear in the GIF.
 - ▶ To make a collage, touch 2 to 9 pictures.

The pictures you touched are displayed along the bottom.

Touch  to remove the pictures you do not want.

4. Touch **NEXT**. The GIF or collage is displayed.
5. Touch the options along the bottom to adjust the final picture.
 - ▶ For GIF, you can adjust the speed, order and size, or touch **MORE** to adjust each picture, and then touch **Manage Frame** to change their order.
 - ▶ For collage, touch **TEMPLATE**, **FREE**, or **COLLAGE** and then select a border, shading or style.

6. When you are satisfied with the final picture, touch  to save the GIF or touch  to save the collage.

Depending on your storage setting, the picture is saved to the *zte_editor* folder in your phone storage or your microSDHC card.

Playing Videos

1. Touch an album in the gallery and then touch the thumbnail of a video.
2. Touch  at the center and select a player to start playing.
3. Touch the video to view the playback controls.

Music

From the home screen, touch  > **Music** to play audio files stored on your phone. Music supports a wide variety of audio formats, so it can play music you purchase from online stores, music you copy from your CD collection, and more.

Viewing Your Music Library

From the home screen, touch  > **Music**, and your music library is displayed. All your audio files are cataloged according to the information stored in the files.

- Touch **All Songs** to view all music files on your phone.
- Touch **Artists** or **Albums** to browse music files on your phone organized by the artist or album name.
- Touch **Folders** to find music files through the folders they are stored in.
- Touch **Favorites** to browse music files you have marked as favorites.
- Touch **Playlists** to view all music playlists you have created.

NOTE:

If an audio file is being played, its name and player controls are displayed at the bottom of the screen. Touch the area to open the playback screen.

Playing Music

Touch a song in the music library to listen to it. Touch the playback bar at the bottom of the screen to open the following playback screen.

You can still control the music when you are not in the playback screen.

- In other apps, flick down the notification panel. Touch the song title to restore the playback screen, or you can

pause/resume playback or skip songs.

- When the screen is locked, the song information and playback controls are displayed on the screen with other notifications. Touch the song title to open the Music app, or you can pause/resume playback or skip songs.

Managing Playlists

Create playlists to organize your music files into sets of songs, so that you can play the songs you like in the order you prefer.

- Touch  > **Add to playlist** next to a song to add it to a playlist or create a new playlist.
- Touch  > **Delete** > **OK** next to a playlist to delete the playlist.
- Touch  > **Rename** next to a playlist to rename the playlist.
- Touch a playlist to view its content. To delete a song, touch and hold the song. Touch additional songs to select multiple songs for removal. Touch  to remove the songs from the playlist.

Video Player

Use the Video Player app to manage your video library and to watch videos.

Opening the Video Library

From the home screen, touch  > **Video Player** to view your video library. Swipe up or down to find the video you want. You can also touch  to search for video files, or touch  > **View by** or **Sort by** to change the display mode or sort the list.

Playing and Controlling Videos

Touch a video in the video library to play it. Touch the screen to show the playback controls. You can control the video and audio or carry out other operations.

NOTES:

- Slide horizontally on the video to rewind or fast forward.
- Slide vertically on the right or left part of the screen to adjust volume or brightness, respectively.
- Touch  or  to skip to the previous or the next video.

Managing Video Files

Delete Videos

1. In the video library, touch  > **Multi-Select**, or touch and hold a video.
2. Touch the videos you want to delete.
3. Touch  > **OK**.

Share Videos

1. In the video library, touch  > **Multi-Select**, or touch and hold a video.
2. Touch the videos you want to share.
3. Touch  and select how you want to share them.

Trim a Video

1. Touch a video to start playing it.
2. Touch  > **Trim**.
3. Drag the two tabs on the progress bar to select the portion you want to keep. You can touch  to preview the selected portion.
4. Stop the preview and touch . The trimmed video is saved as a new video file.

Sound Recorder

Sound Recorder enables you to record voice memos and listen to them whenever you like.

Recording a Voice Memo

1. From the home screen, touch  > **Sound Recorder**.
2. Touch  to turn on or off high quality recording.
3. Touch  to start recording. Touch  to pause and  to continue the recording.
4. Touch  to stop recording. The memo is automatically saved.

Playing a Voice Memo

Play a Memo You Just Recorded

Touch  at the bottom of the screen.

Play Any Saved Memo

1. Touch  at the top right of the screen to see all recordings.
2. Touch the title of a memo to play it.

NOTE:

You can also touch  next to a memo to delete, share, rename, tag, or trim it, check its file information, or set it as your phone ringtone or notification ringtone.

More Apps

Calculator

From the home screen, touch  > **Calculator** to use the phone's convenient built-in calculator for some basic as well as advanced mathematical equations.

 **NOTE:**

To see more calculator options, swipe left while holding the phone in portrait view or turn the phone to landscape view.

Clock

From the home screen, touch  > **Clock**. The Clock app allows you to check local time in places around the world, set alarms, and use timers.

Set a New Alarm

1. Open the Clock app and touch .
2. Touch a default alarm to configure it, or touch  at the bottom of the screen to create a new alarm.
3. Set up the alarm options, such as time, alarm days, snooze, alarm ringtone, and label.
4. Touch **SAVE** to save and exit.

NOTES:

- To enable or disable existing alarms directly, touch the switches on the right side of each alarm.
- Touch  to configure alarm settings, including ringtone volume, alarm duration, vibration, volume crescendo, alarm in silent mode, and side button function.

Use World Clock

1. Open the Clock app and touch .
2. World clock lets you check local times for cities around the world. Touch  to add a new city.

Use Stopwatch and Countdown

1. Open the Clock app and touch  or .
2. Stopwatch allows you to record lap times, while countdown allows you to set a time and count down to zero.

Downloads

The Downloads app keeps a record of the files you have downloaded using apps such as Browser or Email.

From the home screen, touch  > **Downloads**.

- Touch a file to open it with the appropriate application.
- Touch and hold a file to delete or share it.

File Manager

Quickly access all of your images, videos, audio clips, and other types of files on your phone storage and the microSDHC card.

From the home screen, touch  > **File Manager**. Touch **CATEGORY** to find the file you need by category, or touch **LOCAL** to browse folders and files.

- Touch folders and files to access stored items.
- Touch  > **New folder** to create a new folder in the current directory.
- Touch  to search for a file or folder by name.
- Touch and hold a folder or file for options: copy , move , share , delete , and more options .
- To copy or move an item:
 1. Touch and hold the folder or file.
 2. Touch  or .
 3. Navigate to a new location within File Manager and touch **PASTE**.

Google Apps

NOTE:

Google services may be limited in some regions.

- **Chrome:** Use the Chrome app to browse the Internet and get your bookmarks, browsing history, and more synced with your Google account.

- **Drive:** Store files on Google servers for free after you sign in to your Google account. You can access them on your computers, your phones and other devices, share them, or collaborate with others.
- **Duo:** Make a simple video calling which brings you face-to-face with all the people that matter most.
- **Gmail:** Send and receive emails via your Gmail account or other personal email accounts.
- **Google:** Use Google search or get information when you need it with Google assistant.
- **Google+:** Socialize with friends on the Google+ online community.
- **Hangouts:** Chat with Google+ friends or send text or multimedia messages.
- **Maps:** Find your place and find your way in the world.
- **Photos:** Manage photos on the phone and your Google account.
- **Play Books:** Buy and read the electronic version of new bestsellers and classics.
- **Play Games:** Buy and play games from the Google Play Store. Share your gaming experience and progress with your friends.
- **Play Movies & TV:** Purchase, download and watch the latest and your favorite movies and TV shows.
- **Play Music:** Play music on the phone and on your Google account.

- **Play Newsstand:** Purchase and read newspapers and magazines.
- **Play Store:** Purchase and download apps, games, and more from the Google Play Store.
- **Voice Search:** Search for information with your voice.
- **YouTube:** Watch video clips from YouTube.com, or upload your own and share with the world.

Settings

From the home screen, touch  > **Settings**. Settings contains most of the tools for customizing and configuring your phone.

Wireless & Networks

Wi-Fi

Turn Wi-Fi on or off and configure your Wi-Fi connections and Wi-Fi Direct feature. (see [Connecting to Wi-Fi](#) and [Using Wi-Fi Direct](#)).

Bluetooth

Turn *Bluetooth* on or off and configure your *Bluetooth* connections. (see [Connecting to Bluetooth Devices](#)).

Mobile Networks

Control mobile data use and adjust other network settings. (see [Connecting to Mobile Networks](#)).

Data Usage

Check and manage mobile data use. You can view and restrict Wi-Fi data usage as well.

- Touch the **Data Enabled** switch to turn on or off mobile data.
- Turn on the **Set mobile data limit** switch to enable mobile data limit. You can then drag the horizontal limit and warning sliders up or down to set the limit and warning levels. Touch

the time span > **Change cycle...** to set the data usage measuring cycle to set the reset date for usage cycle.

- Below the data usage graph, touch an app to see its data usage during the current time cycle. You can touch **Restrict app background data** to stop the app from using mobile data in the background altogether or during roaming.
- To restrict background data for all apps and services, touch  > **Restrict background data** > **OK**.
- Touch  > **Show Wi-Fi** to view Wi-Fi data usage in the WI-FI tab of the Data usage screen.
- If the Wi-Fi network you use is metered and large amount of data may cost more, touch  > **Network restrictions** and touch the slider next to the metered network. Your phone will then restrict background data on such networks and display warnings before large downloads.

 **NOTE:**

The data usage is measured by your phone, and your carrier's data usage accounting may differ.

Airplane Mode

In the Settings app, touch **More** > **Airplane mode** to turn airplane mode on or off. All the phone's radios that transmit voice or data are turned off when airplane mode is on.

VPN

In the Settings app, touch **More > VPN** to set up and connect to virtual private networks (see [Connecting to Virtual Private Networks](#)).

Default SMS App

In the Settings app, touch **More > Default SMS app** to choose the preferred application for sending and receiving SMS and MMS.

Personal

Display

- **Brightness level:** Set the brightness of the display.
- **Adaptive brightness:** Automatically adjust screen brightness.
- **Wallpaper:** Select a background image or animation for the home screen.
- **Auto-rotate screen:** Set whether to allow the screen to rotate the display with the phone orientation, where applicable.
- **Sleep:** Set the length of time of inactivity before the screen turns off automatically.
- **Daydream:** Manage the screensaver of colors or photos.
- **Font size:** Set the font size of the text on the screen.
- **Pulse notification light:** Flash the indicator light to notify you of missed calls, new messages, and other events.

- **Accelerometer Calibration:** Calibrate the phone's accelerometer when you detect any error during use.
- **Navigation key light duration:** Control the backlight of the **Home** key, **Back** key, and **Recent apps** key. Choose one option to set the backlight duration.

Sound & Notification

Adjust different types of volume (see [Adjusting Volumes](#)), set notification mode (see [Switching to Silent or Vibration Mode](#)), set Do not disturb options (see [Using Do Not Disturb Mode](#)), set up ringtone and notification sound (see [Changing the Ringtone and Notification Sound](#)), set silent power-on/off, set notification options for apps and the lock screen, select system sounds (see [Turning System Sounds On/Off](#)), or set authority of individual apps to access notifications and Do not disturb settings.

Security

In the Settings app, touch **Security** to configure the following options.

- **Screen lock:** Secure your phone and your personal information by creating a screen lock (see [Protecting Your Phone With Screen Locks](#)).
- **Make pattern visible:** Show the pattern as you draw it. This option is available when a Pattern screen lock is set.
- **Automatically lock:** Set the time needed for the lock protection to be activated after the screen turns off. This option is available when a Pattern, PIN, or Password lock is set.

- **Power button instantly locks:** Lock protection is activated immediately when you press the **Power** key. This option is available when a Pattern, PIN, or Password lock is set.
- **Lock screen message:** Set the text that you may display on the lock screen.
- **Smart Lock:** Keep the phone unlocked when connected to trusted devices, in trusted places, when recognizing trusted faces or voices, or while being held or carried.
- **Encrypt phone:** Encrypt your data on the phone to protect your privacy. This feature is enabled by default and you can use it to further protect your phone while setting a screen lock by requiring your pattern, PIN, or password before the phone starts up. See [Protecting Your Phone With Screen Locks](#).
- **Make passwords visible:** Display passwords as you enter them.
- **Device administrators:** View or deactivate apps you have authorized to be device administrators.
- **Unknown sources:** Permit installation of apps from sources other than the Play Store.
- **Storage type:** Check the credential storage type.
- **Trusted credentials:** Display trusted CA certificates.
- **Install from SD card:** Install certificates from the internal storage or the microSDHC card.
- **Clear credentials:** Delete all certificates.
- **Trust agents:** View or deactivate trust agents.

- **Screen pinning:** Keep a screen of your choice in view so that others cannot switch to other apps and access personal information (see [Protecting Your Phone With Screen Pinning](#)).
- **Apps with usage access:** Turn on or off some apps' access to your phone usage information.

Navigation Key

In the Settings app, touch **Navigation key**. You can swap the positions of the **Back** key and the **Recent apps** key. Select an option to make the switch.

Date & Time

In the Settings app, touch **Date & time** to set date, time, time zone, and how time is displayed. You can also use network-provided data (see [Setting the Date and Time](#)).

Language & Input

In the Settings app, touch **Language & input** to manage language and input options.

- **Language:** Select a language for your system.
- **Spell checker:** Activate Google Spell Checker to check for spelling errors when entering text, and change its settings.
- **Personal dictionary:** Add new words to the phone's dictionary or remove words from the dictionary. The words you add are used for spelling check and word suggestion.
- **Current Keyboard:** Set the default method for entering text and enable/disable installed input methods.

- **Google Keyboard:** Set Google Keyboard options.
- **TouchPal Keyboard:** Set Touchpal keyboard options.
- **Google voice typing:** Set options for Google voice text entry.
- **Text-to-speech output:** Select the speech synthesis engine or change its settings, set speech rate and pitch, play a brief sample of the speech synthesizer, and check whether the text-to-speech output feature supports the current system language.
- **Pointer speed:** Select how fast the pointer/mouse should scroll when you connect the phone to a trackpad or mouse accessory.

Google

In the Settings app, touch **Google** to manage settings for Google apps and services that are installed on your device.

Device

Location

Activate location services to determine your location. To use location-related applications, such as finding your location on Google Maps, you must have location services turned on on your phone.

1. From the home screen, touch  > **Settings** > **Location**.
2. Slide the Location switch to the **On**  position to turn on location access.

- When location access is enabled, touch **Mode** to select the location sources you want to use. To get your accurate location, choose **High accuracy**. To save battery power and get approximate location, choose **Battery saving**. To use only GPS to pinpoint your location, choose **Device only**.

 **NOTE:**

Touch **Accelerated Location** or **Google Location History** to use Qualcomm® IZat™ hardware accelerated location to determine your location or configure Google location options.

Storage

The Storage settings menu lets you check memory information for your microSDHC card and phone storage.

You can choose the default location for new data, such as photos captured and voice recorded. Touch **Save location** and select to store items in the phone storage or the installed microSDHC card.

Under Device storage, touch **Phone > Used space** to get a detailed breakdown of space usage by type. Touch a data type to see more information or delete the files you do not need.

For more information about using the phone storage and the microSDHC card, see [Using the microSDHC Card as Portable or Device Storage](#).

Battery

In the Settings app, touch **Battery** to view remaining battery power, check which items have been using the battery, and optimize battery use.

- Touch an app or service to adjust its settings in order to save battery life. For example, touch **Screen > Reduce the screen brightness and/or screen timeout** to change screen brightness and sleep.
- Touch  > **Battery saver**. You can turn Battery saver on or off or configure it to turn on automatically in order to reduce battery use and improve battery life.
- Touch  > **Battery optimization**. Battery optimization helps prolong battery standby time when you're not using the phone. To turn battery optimization off for specific apps, touch **Not optimized > All apps**. Touch the app name and then touch **Don't optimize > DONE**.

Apps

In the Settings app, touch **Apps** to see apps installed on your phone and manage them.

Touch  > **Show system/Hide system** to show/hide system apps in the list.

Touch  > **Reset app preferences** to reset all preferences. (You will not lose app data, but app preferences will be restored to default.)

Touch  to configure apps.

In the app list, touch an app to see its information. The following options may be available:

- **FORCE STOP**: Stop the app.
- **UNINSTALL**: Uninstall the app.

- **DISABLE/ENABLE:** Disable or enable the app.
- **Storage:** Check the amount of storage required and clear its data or cache.
- **Data usage:** Check data used by the app during a specified time cycle or restrict background data for the app.
- **Permissions:** Check or change the app permissions.
- **Notifications:** Manage the app notifications in the notification panel and the lock screen.
- **Open by default:** Check or change settings of the app links and clear defaults.
- **Battery:** Check the battery use details of the app since last full charge.
- **Memory:** Check how much memory has been used by the app.

 **NOTE:**

Not all options are available for all apps.

Memory

In the Settings app, touch **Memory** to monitor the average memory use and performance of your phone. You can also check which apps use the most memory.

Users

In the Settings app, touch **Users** to create up to three additional user accounts so that you can share your phone with others. Each user has their own storage space, wallpaper, screen lock and so on.

- To set up a new user, touch **Add user > OK > SET UP NOW** and follow the prompts.
- To delete a user, touch  next to the user and select **Remove user > DELETE**.
- To switch users, touch the user name in the Users screen, or open the quick settings panel and touch .

 **NOTE:**

- A Guest account is available by default in case anyone needs to use your phone temporarily.
- When other users is finished using your phone, he/she can touch  > **Delete <user name> from this device > DELETE** in the User screen to delete the account and related data from your phone.

Connect to PC

Select your USB connection mode between your phone and PC (see [Connecting Your Phone to a Computer via USB](#)).

Backup & Reset

In the Settings app, touch **Backup & reset**.

- **Back up my data:** Back up app data, Wi-Fi passwords, and other settings to Google servers after you sign in to your Google account.
- **Backup account:** Set the Google account that the data is backed up to.

- **Automatic restore:** Restore previously backed up settings and data when you reinstall an app.
- **Network settings reset:** Reset Wi-Fi, mobile data, and *Bluetooth* settings.
- **Factory data reset:** Reset your phone to factory default settings. All your personal data from the phone storage will be erased. You can also erase the data on the microSDHC card during the process.

Accounts

In the Settings app, touch **Accounts** to manage your accounts and synchronization. Touch **Add account** to sign in to or create accounts on your phone.

Touch an account type to see that type of accounts you have added and adjust their settings.

System

Accessibility

In the Settings app, touch **Accessibility**. You can configure the system accessibility options and accessibility plug-ins on your phone, such as using **Color inversion** for users with sight problems.

Printing

In the Settings app, touch **Printing** to configure Google Cloud Print service or other printer plug-ins. You need to install these apps and services from the Google Play Store and your printer manufacturer.

System Updates

In the Settings app, touch **System updates** to update your PRL (preferred roaming list), your user profile, your Android software, and your phone firmware.

About Phone

In the Settings app, touch **About phone** to view phone status, legal information, 4G status, and other information.

Troubleshooting

If you encounter problems while using the phone, or if it performs abnormally, you can refer to the solutions below. If your particular problem cannot be resolved using the information, contact the dealer where you purchased the phone.

Problem: Phone freezes/operation is unstable.

Solution: Turn the phone on again. If you are unable to turn the phone off, remove and replace the battery, and then turn the phone on again. Data that was being edited is erased after your phone is powered on again.

Problem: Operation is unstable after a new application was installed.

Solution: The newly installed application may be the cause. Uninstall the application in Safe mode. To turn the phone on in Safe mode, press and hold the **Power** key > touch and hold **Power off**, read the disclaimer for safe mode, and then touch **OK**.

 **NOTE:**

Before turning the phone on in Safe mode, it is recommended that you back up important data. After restarting in Safe mode, your phone can be powered on as usual.

Problem: Cannot use phone, mail, or Internet.

Solution 1: Check whether you are where signal is weak or out of service area.

Solution 2: Power the phone on again.

Solution 3: Is the phone in Airplane mode? To check that Airplane mode is canceled, open the Settings app, touch **More**, and check the Airplane mode slider.

Solution 4: Is data communication disabled? To check that data communication is enabled, open the Settings app, touch **Mobile networks**, and check the Data Enabled slider.

Solution 5: Is a disabled data access point set? You can open the Settings app, touch **Mobile networks > Access Point Names > ⋮ > Rest to default** to restore the initial APN settings.

Problem: Battery level goes down quickly.

Solution: Are you where signal is weak or have been out of service area for a long period? Calling where signal is weak or being out of service area uses a lot of battery.

Problem: Cannot install applications.

Solution: Applications cannot be installed with only a little free space on the phone or portable storage. To check free space, see [Storage](#). Applications not supported by your phone cannot be installed either.

Problem: Cannot unlock screen.

Solution: Power the phone on again. If you are unable to turn the phone off, remove and replace the battery, and then power the phone on again. Data that was being edited is erased after the phone is powered on again.

Specifications

Handset specifications are shown in the following table.

Operating system	Android M
Handset standards	LTE/CDMA/GSM/UMTS
Dimensions	Approx. 145.5 x 72.0 x 10.0 mm
Weight	Approx. 155 g (with battery)
Display	5" 854×480
Camera	Front 5 MP; Back 5 MP
Internal memory	ROM: 16 GB, RAM: 2 GB
Removable memory card	Supports microSDHC card up to 32 GB
Battery	2035 mAh
Continuous idle time	4G LTE: up to 207 hours, 3G: up to 400 hours
Continuous talk time	Up to 17 hours
<i>Bluetooth</i>	4.1
HAC	M4/T3

 **NOTE:**

The phone's talk time and idle time are based on ideal working environments. The use of extended backlighting, browser, and network conditions can reduce battery life and talk/idle time.

For Your Safety

General Safety

	Don't make or receive handheld calls while driving. Never text while driving.
	Don't use at gas stations.
	Keep your phone at least 10 mm away from your ear or body while making calls.
	Your phone may produce a bright or flashing light.
	Small parts may cause choking.
	Don't dispose of your phone in fire.
	Your phone can produce a loud sound.
	To prevent possible hearing damage, do not listen at high volume levels for long periods. Exercise caution when holding your phone near your ear while the loudspeaker is in use.
	Avoid contact with anything magnetic.

	Avoid extreme temperatures.
	Keep away from pacemakers and other electronic medical devices.
	Avoid contact with liquids. Keep your phone dry.
	Turn off when asked to in hospitals and medical facilities.
	Don't take your phone apart.
	Turn off when told to in aircrafts and airports.
	Only use approved accessories.
	Turn off when near explosive materials or liquids.
	Don't rely on your phone for emergency communications.

FCC RF Exposure Information (SAR)

This phone is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the United

States.

During SAR testing, this device was set to transmit at its highest certified power level in all tested frequency bands, and placed in positions that simulate RF exposure in usage against the head with no separation, and near the body with the separation of 10 mm. Although the SAR is determined at the highest certified power level, the actual SAR level of the device while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

The exposure standard for wireless devices employing a unit of measurement is known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg.

This device is complied with SAR for general population /uncontrolled exposure limits in ANSI/IEEE C95.1-1992 and had been tested in accordance with the measurement methods and procedures specified in IEEE1528.

The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of www.fcc.gov/oet/ea/fccid after searching on FCC ID: SRQ-N9136.

For this device, the highest reported SAR value for usage against the head is 0.62 W/kg, and for usage near the body is 1.19 W/kg. While there may be differences between the SAR levels of

various phones and at various positions, they all meet the government requirements.

SAR compliance for body-worn operation is based on a separation distance of 10 mm between the unit and the human body. Carry this device at least 10 mm away from your body to ensure RF exposure level compliant or lower to the reported level. To support body-worn operation, choose the belt clips or holsters, which do not contain metallic components, to maintain a separation of 10 mm between this device and your body.

RF exposure compliance with any body-worn accessory, which contains metal, was not tested and certified, and using such body-worn accessory should be avoided.

FCC Regulations

This mobile phone complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This mobile phone has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that

interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

 **CAUTION:**

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The antenna(s) used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Hearing Aid Compatibility (HAC) regulations for Mobile Phones

In 2003, the FCC adopted rules to make digital wireless telephones compatible with hearing aids and cochlear implants. Although analog wireless phones do not usually cause interference with hearing aids or cochlear implants, digital wireless phones sometimes do because of electromagnetic

energy emitted by the phone's antenna, backlight, or other components. Your phone is compliant with FCC HAC regulations (ANSI C63.19- 2011). While some wireless phones are used near some hearing devices (hearing aids and cochlear implants), users may detect a buzzing, humming, or whining noise. Some hearing devices are more immune than others to this interference noise and phones also vary in the amount of interference they generate. The wireless telephone industry has developed a rating system for wireless phones to assist hearing device users in finding phones that may be compatible with their hearing devices. Not all phones have been rated. Phones that are rated have the rating on their box or a label located on the box. The ratings are not guarantees. Results will vary depending on the user's hearing device and hearing loss. If your hearing device happens to be vulnerable to interference, you may not be able to use a rated phone successfully. Trying out the phone with your hearing device is the best way to evaluate it for your personal needs.

This phone has been tested and rated for use with hearing aids for some of the wireless technologies that it uses. However, there may be some newer wireless technologies used in this phone that have not been tested yet for use with hearing aids. It is important to try the different features of this phone thoroughly and in different locations, using your hearing aid or cochlear implant, to determine if you hear any interfering noise. Consult your service provider or the manufacturer of this phone for information on hearing aid compatibility. If you have questions about return or exchange policies, consult your service provider or phone retailer.

M-Ratings: Phones rated M3 or M4 meet FCC requirements and are likely to generate less interference to hearing devices than phones that are not labeled. M4 is the better/higher of the two ratings.

T-Ratings: Phones rated T3 or T4 meet FCC requirements and are likely to be more usable with a hearing device's telecoil ("T Switch" or "Telephone Switch") than unrated phones. T4 is the better/higher of the two ratings. (Note that not all hearing devices have telecoils in them.)

Your phone meets the M4/T3 level rating.

Hearing devices may also be rated. Your hearing device manufacturer or hearing health professional may help you find this rating. For more information about FCC Hearing Aid Compatibility, please go to <http://www.fcc.gov/cgb/dro>.

Distraction

Driving

Full attention must be given to driving at all times in order to reduce the risk of an accident. Using a phone while driving (even with a hands free kit) can cause distraction and lead to an accident. You must comply with local laws and regulations restricting the use of wireless devices while driving.

Operating Machinery

Full attention must be given to operating machinery in order to reduce the risk of an accident.

Product Handling

General Statement on Handling and Use

You alone are responsible for how you use your phone and any consequences of its use.

You must always turn off your phone wherever the use of a phone is prohibited. Use of your phone is subject to safety measures designed to protect users and their environment.

- Always treat your phone and its accessories with care and keep it in a clean and dust-free place.
- Keep the screen and camera lens clean. Unclean screen or camera lens may slow down the phone's reaction to your operations or lower image quality.
- Clean the device and its accessories with a soft material such as cleaning cloth for eyeglass lenses. Do not use alcohol or other corrosive substances for cleaning or allow them to get inside.
- Do not expose your phone or its accessories to open flames or lit tobacco products.
- Do not expose your phone or its accessories to liquid, moisture or high humidity.
- Do not drop, throw or try to bend your phone or its accessories.
- Do not paint your phone or its accessories.
- Do not attempt to disassemble your phone or its accessories.

Only authorized personnel can do so.

- Do not expose or use your phone or its accessories in a environment with or that can reach extreme temperatures, minimum - 5 and maximum +50 degrees Celsius.
- Do not place your phone inside or near heating equipments or high pressure containers, such as water heaters, microwave ovens, or hot cooking utensils. Otherwise, your phone may be damaged.
- Please check local regulations for disposal of electronic products.
- Do not carry your phone in your back pocket as it could break when you sit down.

Small Children

Do not leave your phone and its accessories within the reach of small children or allow them to play with it.

They could hurt themselves or others, or could accidentally damage the phone.

Your phone contains small parts with sharp edges that may cause an injury or may become detached and create a choking hazard.

Demagnetization

To avoid the risk of demagnetization, do not allow electronic devices or magnetic media to be close to your phone for a long time.

Electrostatic Discharge (ESD)

Do not touch the metal connectors on the nano-SIM card and the microSDHC card.

Antenna

Do not touch the antenna unnecessarily.

Normal Use Position

When placing or receiving a phone call, hold your phone to your ear, with the bottom towards your mouth.

Air Bags

Do not place a phone in the area over an air bag or in the air bag deployment area as an airbag inflates with great force and serious injury could result.

Store the phone safely before driving your vehicle.

Seizures/Blackouts

The phone can produce a bright or flashing light. A small percentage of people may be susceptible to blackouts or seizures (even if they have never had one before) when exposed to flashing lights or light patterns such as when playing games or watching video. If you have experienced seizures or blackouts or have a family history of such occurrences, please consult a physician.

Repetitive Strain Injuries

To minimize the risk of Repetitive Strain Injury (RSI) when texting or playing games with your phone:

- Do not grip the phone too tightly.
- Press the buttons lightly.
- Use the special features which are designed to minimize the times of pressing buttons, such as Message Templates and Predictive Text.
- Take many breaks to stretch and relax.

Emergency Calls

This phone, like any wireless phone, operates using radio signals, which cannot guarantee connection in all conditions. Therefore, you must never rely solely on any wireless phone for emergency communications.

Loud Noise

This phone is capable of producing loud noises, which may damage your hearing. Turn down the volume before using headphones, Bluetooth stereo headsets or other audio devices.

Phone Heating

Your phone may become warm during charging and during normal use.

Electrical Safety

Accessories

Use only approved accessories.

Do not connect with incompatible products or accessories.

Take care not to touch or allow metal objects, such as coins or key rings, to contact or short-circuit in the battery terminals.

Never puncture the surface of the battery with sharp objects.

Connection to a Car

Seek professional advice when connecting a phone interface to the vehicle electrical system.

Faulty and Damaged Products

Do not attempt to disassemble the phone or its accessories.

Only qualified personnel can service or repair the phone or its accessories.

If your phone (or its accessories) has been submerged in water, punctured, or subjected to a severe fall, do not use it until you have taken it to be checked at an authorized service center.

CTIA Requirements

- Do not disassemble or open crush, bend or deform, puncture or shred.
- Do not modify or remanufacture, attempt to insert foreign

objects into the battery, immerse or expose to water or other liquids, expose to fire, explosion or other hazard.

- Only use the battery for the system for which it is specified.
- Only use the battery with a charging system that has been qualified with the system per CTIA Certification Requirements for Battery System Compliance to IEEE 1725. Use of an unqualified battery or charger may present a risk of fire, explosion, leakage, or other hazard.
- Do not short circuit a battery or allow metallic conductive objects to contact battery terminals.
- Replace the battery only with another battery that has been qualified with the system per this standard, IEEE-Std-1725. Use of an unqualified battery may present a risk of fire, explosion, leakage or other hazard.
- Promptly dispose of used batteries in accordance with local regulations.
- Battery usage by children should be supervised.
- Avoid dropping the phone or battery. If the phone or battery is dropped, especially on a hard surface, and the user suspects damage, take it to a service center for inspection.
- Improper battery use may result in a fire, explosion or other hazard.
- The phone shall only be connected to CTIA certified adapters, products that bear the USB-IF logo or products that have completed the USB-IF compliance program.

Radio Frequency Interference

General Statement on Interference

Care must be taken when using the phone in close proximity to personal medical devices, such as pacemakers and hearing aids.

Pacemakers

Pacemaker manufacturers recommend that a minimum separation of 15 cm be maintained between a mobile phone and a pacemaker to avoid potential interference with the pacemaker. To achieve this, use the phone on the opposite ear to your pacemaker and do not carry it in a breast pocket.

Hearing Aids

People with hearing aids or other cochlear implants may experience interfering noises when using wireless devices or when one is nearby.

The level of interference will depend on the type of hearing device and the distance from the interference source. Increasing the separation between them may reduce the interference. You may also consult your hearing aid manufacturer to discuss alternatives.

Medical Devices

Please consult your doctor and the device manufacturer to determine if operation of your phone may interfere with the operation of your medical device.

Hospitals

Turn off your wireless device when requested to do so in hospitals, clinics or health care facilities. These requests are designed to prevent possible interference with sensitive medical equipment.

Aircraft

Turn off your wireless device whenever you are instructed to do so by airport or airline staff.

Consult the airline staff about the use of wireless devices onboard the aircraft. If your device offers a 'flight mode', this must be enabled prior to boarding an aircraft.

Interference in Cars

Please note that because of possible interference with electronic equipment, some vehicle manufacturers forbid the use of mobile phones in their vehicles unless a hands-free kit with an external antenna is included in the installation.

Explosive Environments

Gas Stations and Explosive Atmospheres

In locations with potentially explosive atmospheres, obey all posted signs to turn off wireless devices such as your phone or other radio equipment.

Areas with potentially explosive atmospheres include fueling areas, below decks on boats, fuel or chemical transfer or storage facilities,

and areas where the air contains chemicals or particles, such as grain, dust, or metal powders.

Blasting Caps and Areas

Power off your mobile phone or wireless device when in a blasting area or in areas posted power off “two-way radios” or “electronic devices” to avoid interfering with blasting operations.

LCA Assessment

We have done an LCA assessment for ZTE N9136 using the LCA assessment systems (EIME system) from BV, and have had it peer-reviewed by our Green Product manager who confirms that the LCA test report complies with related standard requirement.
